DETAILED ACTION

Allowable Subject Matter

Claims 2-11, 14-18, and 35-37 are allowed.

The following is an examiner's statement of reasons for allowance: As independent claims were read in light of the specification, the prior art of record fails to disclose or render obvious a radiation source comprising an outer housing having a fastener, said outer housing configured to be opened, a substrate removably contained within said outer housing, said substrate having a front surface and a radioactive deposit fixedly deposited upon said front surface within said outer housing, said radioactive deposit having a radioisotope wherein said substrate is flexible or with the appropriate form factor or radiopaque deposited with a colorant.

The closest prior art of record, Itakura (5,365,076) and Peterson et al. (WO 01/84560), teach a radiation source comprising an outer housing having a fastener, said outer housing configured to be opened, a substrate removably contained within said outer housing, said substrate having a front surface and a radioactive deposit fixedly deposited upon said front surface within said outer housing, said radioactive deposit having a radioisotope. However, they are silent to the use of a flexible substrate within such a housing or a substrate with the appropriate form factor or radiopaque deposited with a colorant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
